DETAILED ACTION

1. This communication is in response to amendment filed 1/21/05.

Response to Amendment/Remarks

2. Claims 1-31 are currently pending. Independent claims 1, 7, 15 have been amended.
3. Rejection under 35 USC 101 and 35 USC 112(first, second) have been withdrawn.
4. The pending claims contain certain deficiencies which render them indefinite under 35 USC 112(second). (See discussion below).

Claim Rejections - 35 USC § 112

5. Claims 1-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. The following analysis of independent claim 1 identifies deficiencies present in the claim which also applies to all independent claims.
7. Since payment behavior is abstract parameter (expressed in non quantitative manner) it cannot be mathematically combined with parameters expressed in numerical terms such as "roll-rates". Therefore the limitations "payment behavior" applied in the claim renders the claim as a whole indefinite. Please specify quantitative measure indicative of the behavior which is combined with other numerical

Art Unit: 3624

parameters (i.e. parameters expressed in numbers suitable in mathematical operations). For instance, the borrower's behavior after initiating the collection strategy can only be compared to the predicted behavior if expressed in some normalized manner (e.g. expressed numerically). Even if the comparison may be accomplished without numerical expression, the mathematical operation required in prediction of the roll rate (a measure of loans in a portfolio moving from one delinquency status to another status) require that the payment behavior be expressed in terms of a quantifiable parameters expressed in a numerical terms.

8. Use of terms "may be" renders the claim indefinite. See for example line 7, claim 1 which recites "may be utilized..". Although the limitation following the term "may be" is only intended use of the limitation "a plurality of collection strategies" it is recommended that the claimed be amended to remove the resulting indefiniteness.
9. The claim recites step of "comparing the borrower's payment after initiating the at least one collection strategy to the predicted payment behavior of the borrower". However, there is no outcome of the comparison recited not any utility of the comparison recited.
10. Since the predicted roll rate is only based upon
 - a payment history of each loan including payment behavior after initiating the collection strategy
 - the calculated amount generated and the expense incurred
 - the calculated probability that an event will occurand none of this parameters indirectly depend on the predicted payment behavior, it is unclear the purpose of limitations reciting "predicting a payment behavior" and "generating delinquency moving matrices".

And

11. The step of predicting roll rate is performed for "each loan in the group of the loans based upon payment history of each loan" whereas the behavior determined is applicable to a single borrower and the collection strategy applied to only a single loan. Also the amount and expense and the probability calculations are applied only to a single loan.

Appropriate corrections and/or detailed explanation for each of the deficiency described above are required.

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
